SUMMARY

Software Engineering student with hands-on experience building end-to-end ML systems, Generative AI applications, and RAG pipelines. Proficient in Python, PyTorch, and cloud deployment. Strong foundation in statistics, data structures, and algorithms. Passionate about turning ML research into production-ready systems that solve real problems.

PROJECTS

RAG Document Assistant · Personal Project | 2024

- Built a production-grade Retrieval-Augmented Generation system allowing users to query PDF documents using natural language.
- Implemented vector embeddings with FAISS and integrated OpenAI/HuggingFace LLMs for context-aware answer generation.
- Deployed as a Streamlit web app with document upload, chunking pipeline, and real-time Q&A interface.
- **PyTorch · LangChain · FAISS · OpenAI API · Streamlit · Python** Tech stack:

Cryptocurrency Price Prediction · Personal Project | 2024

- Designed and trained a time-series forecasting model to predict cryptocurrency prices using historical OHLCV data.
- Experimented with LSTM networks and traditional ML baselines (Random Forest, XGBoost); evaluated with MAE and RMSE.
- Performed full EDA — correlation analysis, feature engineering on lag features, rolling statistics, and volume indicators.
- **Python · PyTorch · Scikit-learn · Pandas · Matplotlib** Tech stack:

Youth Unemployment Forecasting · Personal Project | 2024

- Built a regression and time-series pipeline to forecast youth unemployment rates using World Bank macroeconomic data.
- Conducted extensive feature engineering including GDP growth, education index, population variables, and country encodings.
- Compared Linear Regression, Ridge, Gradient Boosting, and LSTM models; documented experiment results with metrics.
- **Python · Scikit-learn · Pandas · Matplotlib · Seaborn** Tech stack:

PDF QA Bot · Personal Project | 2024

- Created an intelligent document question-answering bot that processes uploaded PDFs and answers questions using semantic search.
- Built custom chunking and embedding pipeline optimised for multi-page technical documents.
- **Python · LangChain · HuggingFace Transformers · FAISS · Gradio** Tech stack:

AI Study Coach · Personal Project | 2025

- Developed an AI-powered study assistant that generates personalised quizzes, explains concepts, and tracks learning progress.
- Used prompt engineering and LLM chaining to dynamically adapt difficulty based on user performance.
- **Python · OpenAI API · LangChain · Streamlit** Tech stack:

ConvoPro — Private Chatbot Platform · Personal Project | 2025

- Built a private, self-hosted conversational AI platform with persistent memory and multi-session context management.
- Implemented conversation history compression and context window management for long multi-turn interactions.
- **Python · OpenAI API · FastAPI · React · PostgreSQL** Tech stack:

GenAI Streamlit Chatbot · Personal Project | 2024

- Deployed a full-stack Generative AI chatbot with streaming responses, chat history, and custom system prompts via a clean UI.
- **Python · OpenAI API · Streamlit · LangChain** Tech stack:

MCP Server · Personal Project | 2025

- Built a Model Context Protocol server enabling AI agents to interact with external tools and APIs through a standardised interface.
- **Python · FastAPI · MCP SDK** Tech stack:

Wolf Drop — B2B Dropshipping Platform · Freelance Client | 2025

- Developing a full-stack B2B dropshipping web application for a real client, handling product catalogue, supplier integration, and order management.
- Responsible for full project architecture, API design, and frontend implementation.
- **React · Node.js · PostgreSQL · REST API** Tech stack:

EDUCATION

Nisantasi University · Istanbul, Turkey

B.Sc. Software Engineering · 2021 – 2026 · GPA 3.0 / 4.0

CERTIFICATIONS

Generative AI & AI Agents — Building RAG and Autonomous Systems — Udemy · Sep 2025

AI Engineering | Build, Train & Deploy Models with AWS SageMaker — Zero To Mastery Academy

Statistics Bootcamp — Zero To Mastery Academy · Jun 2025

Prompt Engineering Bootcamp — Udemy

TECHNICAL SKILLS

ML & AI: PyTorch · TensorFlow · Scikit-learn · HuggingFace · LangChain · LlamaIndex

Data: Pandas · NumPy · Matplotlib · Seaborn · SQL · Feature Engineering · EDA

Generative AI: LLMs · RAG · Prompt Engineering · Vector Databases · FAISS · Embeddings

Languages: Python · JavaScript · Java · HTML/CSS

Infrastructure: FastAPI · Streamlit · Docker · AWS SageMaker · Git · Linux
